### Our Presenters

**JACKIE BODWELL** is co-owner of Specialized Home Care Services with spouse CJ. Their family-owned company serves individuals & their families on Medicaid Waiver, providing individualized home modifications & equipment to help families live their best life. Prior to that, Jackie was a Respiratory Therapist for 20 years at Peyton Manning Children's Hospital. They started the company when their middle child, who has a rare chromosome deletion, began to outgrow early childhood products that helped her. What they found was often too expensive to buy, so they launched Specialized Home Care Services to help others make their home safe & accessible to their specific needs.

**RUTH ROBERTS** worked as a case manager through CICOA for 12 years before becoming an RFA Specialist for IPMG for 15 years, working as the liaison between case managers & providers to help waiver individuals with equipment & home modifications. In 2022 she began working as the Outreach Specialist at Specialized Home Care Services, where she helps others understand the many options that their waiver can cover.
