## Fresh Graduate Re-Enters the Job Market

In his mid-50s, Fred isn't your typical graduate. He had worked in the technology field years ago, but then was out of the workforce for a while. When he tried to re-enter the field, he couldn't even get an interview.

"We've been working together for months through **Community Employment** to find a job," says Employment Consultant Whitney Green. This service empowers people with disabilities and other challenges to land a job and move forward toward their career dreams.

"In the mid-90s you learned on the job, but the world is very different now," Fred says. "I applied for so many jobs, but I simply didn't have the certifications to even land an interview."

They decided that Fred should enroll in **Per Scholas**, a nationwide not-for-profit that offers graduates the opportunity to earn a variety of IT certifications through intensive full-time courses at no cost to students.

Three months later, Fred stood at his graduation ceremony beaming as he held a certificate of perfect attendance as well as the "Most Valuable Technologist" designation determined by his classmates. More importantly, he earned his CompTIA A+ certification and is on his way to a job in network security.

## Leading with a Fresh Coat of Paint

Besides our frontline staff, our **volunteers** are the lifeblood of Noble. They tackle everything from garden clean-up to writing pen pal letters with the people we serve. Just in the last year, over 450 people donated their time to help further our mission

This past weekend, the job on the docket was to paint the expansive hallways at Noble East. Six up-and-coming leaders through **Zarvos Leadership & Coaching** spent Saturday afternoon painting the walls a fresh shade of gray that will provide a

gorgeous backdrop to artwork created by the artists we serve.
